**Our Family of drug detection, identification and forensic products** provide law enforcement officers and investigators distinct advantages for field and laboratory use. As with all Mistral products, they are first and foremost non-toxic, non-carcinogenic and will not harm the environment. In addition, they insure a testing process which is convenient, fast and efficient. No glass ampoules, spatulas or waiting time required. Results in seconds. The identification/detection process requires no special training and testing can be performed "on the spot".

**Detect 4 Drugs (D4D)** is a 100 test size aerosol reagent spray that will detect and identify 4 drugs at once. Wiping any surface once with the Special Test paper #630, and spraying the paper with the reagent from this can, will reveal traces of:

Hashish or Marijuana, as reddish brown stains, Heroin, as purple gray stains, Amphetamine, as canary-yellow stains and Meth-amphetamines, as orange stains. D4D - is available in a kit containing: D4D 100 test size, Coca-Test 100 test size, 100 special test papers, 100 collection papers, color chart and carrying case.

**Coca-Test** is an aerosol-based field test kit for the detection and identification of cocaine, crack and related drugs. Coca-Test contains a patented, modified Cobalt Thiocyanate (Scott) reagent. Using our collection paper

Model #0530, simply wipe the suspected surface or touch the seized substance and spray with Coca-Test. A turquoise color reaction on the collection paper indicates a positive reaction.

**Herosol** is a unique, aerosol-based field test kit for the detection and identification of street grade heroin, china white and related drugs. Using our collection paper Model #0530, simply wipe the suspected surface or touch the seized substance and spray

with Herosol. A purple color reaction on the collection paper indicates a positive reaction.

**Cannabispray** is an aerosol-based field test kit for the detection and identification of marijuana, hashish and related drugs. Cannabispray contains a patented modified Fast Blue BB reagent. Product modifica-

tions have been incorporated to reduce the number of false positives, remove suspected carcinogenic elements and stabilize this well known reagent. Using our collection paper, model #0530, simply wipe the suspected surface or touch the seized substance. Spray first with Cannabispray #1 and then with Cannabispray #2. A reddish brown color reaction on the collection paper indicates a positive reaction.

**Meth-Test** is an aerosol-based field test kit for the detection and identification of methamphetamine (MDMA) and related drugs. Meth-Test contains a modified Simon reagent. Product modifications have

been incorporated to reduce the number of false positives, stabilize the traditional Simon reagent and eliminate sensitivity to temperature extremes. Using our special test paper, Model #0630, simply wipe the suspected surface or touch the seized substance. Spray first with Meth-Test #1 and then with Meth-Test #2. A dark blue color reaction on the collection paper indicates a positive reaction.
